

B MANOJ

DevOps Engineer

+91 8431799806 manojb1022@gmail.com linkedin/manojb Bengaluru, IN

SUMMARY

Experienced DevOps Engineer with 4 years in designing and automating cloud-native infrastructure using AWS, Kubernetes, and Terraform. Skilled in CI/CD pipeline development, container orchestration, and system monitoring with Prometheus and Grafana. Adept at cross-functional collaboration and driving operational efficiency through automation and reliability engineering.

EXPERIENCE

Software Engineer 1

PowerSchool India Pvt Ltd 04/2024 - Present Bengaluru, IN

- Developed automated deployment procedures using Argo Workflows with Bash scripting, enhancing operational efficiency and consistency
- Designed UI and backend using Next.js and TypeScript for platform features, improving user experience and system functionality
- Automated AWS RDS backups to S3, reducing downtime by 90 percent in critical scenarios and improving disaster recovery
- Designed and deployed scalable AWS EFS for multi-tenant system with automated provisioning/decommissioning in Kubernetes, reducing manual workload by 80 percent
- Orchestrated AWS EKS clusters using Terraform, ensuring scalable and robust infrastructure for production environments
- Led and executed stable production releases, ensuring minimal downtime and high system reliability

Associate Software Engineer II

PowerSchool India Pvt Ltd 04/2023 - 03/2024 Bengaluru, IN

- Optimized deployments by refining Helm configurations, managing dynamic secrets, and resolving scaling issues in StatefulSets.
- Led and executed seamless migration from Azure to AWS for 100+ applications, ensuring smooth transition and project success
- Enhanced Kubernetes configurations to optimize system performance and scalability, improving operational efficiency
- Developed and improved both the user interface and the backend components, improving the efficiency of internal tools

Associate Software Engineer I

PowerSchool India Pvt Ltd 10/2021 - 03/2023 Bengaluru, IN

- Developed reusable components, reducing development efforts and improving code maintainability
- Resolved 130+ Jira tickets, significantly reducing backlog and ensuring smooth project progression
- Collaborated with QA and Product teams throughout Agile life-cycle, ensuring high-quality and timely project delivery
- Mentored and onboarded new developer teams, facilitating integration and productivity in ongoing projects

SKILLS

AWS	Kubernetes	Docker	CI/CD
Argo Workflows	Grafana	Helm	
Terraform	JavaScript	JIRA	Git
Prometheus	Python	SQL	
Bash scripting			

EDUCATION

Master of Computer Science (MCA)

Kristu Jayanti College, Autonomous

08/2019 - 08/2021
Bengaluru, IN

KEY ACHIEVEMENTS

- VP and Senior Director Recognition
Recognized for achieving the highest number of bug resolutions with 130+ tickets
- Power Team Award
Awarded for best overall team performance

INTERESTS

- Extra-Curricular Activities
Runner-up in inter-collegiate IT fest, showcasing problem-solving and technical skills in competitive environments.
- Led and coordinated college fests *SHELLS* and *MANOEUVRE*, demonstrating leadership, team management, and event planning capabilities.
